Coder Dojo – Introduction

Welcome to the first ever Coder Dojo in Drogheda!

Over the course of the next 3 hours we'll be running through the basics of web development! We've broken up the day into different tutorials, and these will walk you through everything you need to know to get started making your own websites! You'll find each of the tutorials in the folders on the desktop. Below is a quick rundown of what's in each tutorial.

Take your time! Go at your own pace, if you don't understand anything, get stuck or have any questions there's lots of us on hand to help you out! (and if you find the pace a bit too slow we'll find something for you to challenge you!)

Tutorial 1
Your first web page! This will take you through what you need to make a web page, and making your first web page!

Tutorial 2
Tables and Lists! Ok, so you have your first web page, but what if you have a table of stuff to make? How about a list of items?

Tutorial 3
Not so black and white anymore! Adding CSS, or styling to your web page so it has colours and a bit more life!

Tutorial 4
A bit more creative! Let's get a menu going with a few different pages.

Tutorial 5
So you have a website now! Let's make thing complicated and bring in a third language!
